

Homework

We are having a Science week in school this week and continuing after half term with Science investigations. To link with our topic on changes we will be planting beans this week. The children will bring these home on Friday so they can be looked after over half term. Please bring them back to school on the Tuesday so we can look at how they have changed.

As part of the investigation week after half term, we would like the children to find something that can be changed e.g. chocolate can be melted, water can be frozen, wood can be burnt etc. Talk to your child this week and help them think of something they would like to change and how they would like to change it. Talk about what they think will happen to their item. Bring it to school on Friday and we will do our investigations after half term!
