

Year 2

Homework

Please complete all homework for Monday
3rd October.

Maths: We are learning about different shapes. Can children find any of these shapes at home: **squares, rectangles, triangles, circles, cubes, pyramids, hexagons, pentagons, octagons, spheres and cuboids?** Can they use these words when they are talking about the shapes: **face, corner, edge, side, flat, curved surface, straight, round, hollow, solid?**

Topic: We have been looking at different maps and atlases in class and have begun to talk about keys. If you have any maps at home, especially maps of the area, the children would like to look at them with you and talk about what they can see.

Thank you, Year 2 Team
