6 May 2011

To Year 3 and 4 Parents/Carers

Sex and Relationship education will take place this half of the summer term as part of our science work on life cycles.

The key areas of focus for Years 3/4 will be life cycles of living things and growth from baby to adult (for Y4 this will include the growth of a foetus during pregnancy and differences between male and female). The key areas of focus for Year 5 are bodily changes and the development of a baby from conception through childhood. In addition, Year 6 will be learning about puberty in greater detail and how it relates to them personally.

If you wish to discuss this further, please contact any of the Year 3/4 team.
